MANOSSUSIAS

MATTIA BONAVOLONTA'

His hands are the terminal of a tireless, always learning mind, just challenge him with something unknown and a factory of ideas deliver in just a few minutes an unexpected solution. When in silence something awesome is cooking in his abstract mind. Curious and detailed with a great capacity to observe, his biggest passions are the result of very conscious process where he prints his soul: photography, sailing, pastry, modelling. Capable of handling diverse projects contemporary because of his practical asset and spirit of commitment.

Manossusias means get your hands dirty, means experiment, imagine and throwing yourself in everything you do, because through action our spirits get creative. We embrace the possibility of choosing different ways to live by using our capacity to dream and communicate what we think. Manossusias is all about going beyond and making the unthinkable, real!
Make others experience the surprise of unseen.

MONICA MARCONI

Small concentrate of surprises, in a short time has transformed my vision of design. She brought from Colombia not only its culture, but also the strength to create something unseen. An unstoppable mindset, who has done of her child soul, her real weapon. Huge creativity flows into a manual dexterity that goes from illustration to sculpture, through tailoring, but especially the desire to make, give her capability to build prototypes with a soul. Her artistic spirit, dancing, painting and love for the Oriental philosophy, are always visible in her work.

WASHBASIN

Paray is a concept of high tech wash basin, designed for the 2014 Cristalplant design contest. the starting point was to reduce ornaments to their minimal expression by eliminating the tap and instead using a touch-sensor mechanism. The clean line enhances the sensation of the falling water and taking advantage of the moulding characteristics of the material we extended the surface to create the space for storage, making sink and drawers all in one.

CARTOON

SOLID LIGHT

Kyky lamp was designed for the young Guzzini line called E-my; it starts as materialisation of a Mickey cartoon where he holds a torch to get into a cave, the idea of making it a real object and getting the light cone solid was just fun! its made out of PP for the diffuser and LDPE for the handler, the light wire is covered in fabric for a friendlier look. It comes in three different color so you can choose your own childhood lamp reminder.

AESTHETICS

CURVES

La Martina was designed to reflect the aesthetic identity of the designer in an technical object such as the bicycle, this was developed in a academic environment where we settle a collective named "bicicirculo Urbano" where particularly the majority of the designers were women. The results were presented in the international bicycle week of Bogotá and in the bike friendly exhibition held at the Chamber of commerce di Bogotá (CCB).

GREEN
FACADES

GROWINTILES is a conceptual green facade created for the 2013 ceramic future contest. The design talks about the moldability of the material into convexities thought to harbour plants, the long deformed tiles refuge the nature caos. just like they grow spontaneously in the streets. the clean line and simple form becomes the canvas of beautiful shapes and colours chosen and planted by the user, so allowing the personalisation. The project was awarded a Cersaie in 2013.
